Date :

**Full Environmental Assessment Form**  
**Part 3 - Evaluation of the Magnitude and Importance of Project Impacts**  
**and**  
**Determination of Significance**

Part 3 provides the reasons in support of the determination of significance. The lead agency must complete Part 3 for every question in Part 2 where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.

Based on the analysis in Part 3, the lead agency must decide whether to require an environmental impact statement to further assess the proposed action or whether available information is sufficient for the lead agency to conclude that the proposed action will not have a significant adverse environmental impact. By completing the certification on the next page, the lead agency can complete its determination of significance.

**Reasons Supporting This Determination:**

To complete this section:

- Identify the impact based on the Part 2 responses and describe its magnitude. Magnitude considers factors such as severity, size or extent of an impact.
- Assess the importance of the impact. Importance relates to the geographic scope, duration, probability of the impact occurring, number of people affected by the impact and any additional environmental consequences if the impact were to occur.
- The assessment should take into consideration any design element or project changes.
- Repeat this process for each Part 2 question where the impact has been identified as potentially moderate to large or where there is a need to explain why a particular element of the proposed action will not, or may, result in a significant adverse environmental impact.
- Provide the reason(s) why the impact may, or will not, result in a significant adverse environmental impact
- For Conditional Negative Declarations identify the specific condition(s) imposed that will modify the proposed action so that no significant adverse environmental impacts will result.
- Attach additional sheets, as needed.

The following impacts were identified during completion of the Full Environmental Assessment Form - Part 2 as having the potential to occur at greater than a small level and will be evaluated further during the DEIS process:

- The proposed action may involve construction on slopes of 15% or greater.
- The proposed action may involve construction within or adjoining a freshwater or tidal wetland, or in the bed or banks of any other water body.
- The proposed action has the potential to disturb contaminated material during excavation and construction.
- The proposed action may substantially interfere with nesting/breeding, foraging, or over-wintering habitat for the predominant species that occupy or use the project site.
- The proposed action requires the conversion of more than 10 acres of forest, grassland or any other regionally or locally important habitat.
- Proposed action may be visible from any officially designated federal, state, or local scenic or aesthetic resource.
- The proposed action may be visible from publicly accessible vantage points.
- The proposed action may occur wholly or partially within, or substantially contiguous to, an area designated as sensitive for archaeological sites on the NY State Historic Preservation Office (SHPO) archaeological site inventory.
- The proposed action may alter the present pattern of movement of people or goods.
- The proposed action will require the creation or extension of an energy transmission or supply system to serve more than 50 single or two-family residences or to serve a commercial or industrial use.
- The proposed action may produce sound above noise levels established by local regulation.
- The proposed action may result in light shining onto adjoining properties.
- The proposed action may result in lighting creating sky-glow brighter than existing area conditions.
- The site of the proposed action is currently undergoing remediation.
- There is a completed emergency spill remediation, or a completed environmental site remediation on, or adjacent to, the site of the proposed action.
- The site of the action is subject to an institutional control limiting the use of the property.
- The proposed action may affect institutional control measures that were put in place to ensure that the site remains protective of the environment and human health.
- The proposed action involves construction or modification of a solid waste management facility.
- The proposed action may result in the unearthing of solid or hazardous waste.
- The proposed action may result in excavation or other disturbance within 2000 feet of a site used for the disposal of solid or hazardous waste.
- The proposed action may create a demand for additional community services.
- Proposed action is inconsistent with the character of the existing natural landscape.

**Determination of Significance - Type 1 and Unlisted Actions**

SEQR Status:       Type 1       Unlisted

Identify portions of EAF completed for this Project:    Part 1       Part 2       Part 3

Upon review of the information recorded on this EAF, as noted, plus this additional support information

No additional information

and considering both the magnitude and importance of each identified potential impact, it is the conclusion of the  
County of Onondaga as lead agency that:

A. This project will result in no significant adverse impacts on the environment, and, therefore, an environmental impact statement need not be prepared. Accordingly, this negative declaration is issued.

B. Although this project could have a significant adverse impact on the environment, that impact will be avoided or substantially mitigated because of the following conditions which will be required by the lead agency:

There will, therefore, be no significant adverse impacts from the project as conditioned, and, therefore, this conditioned negative declaration is issued. A conditioned negative declaration may be used only for UNLISTED actions (see 6 NYCRR 617.d).

C. This Project may result in one or more significant adverse impacts on the environment, and an environmental impact statement must be prepared to further assess the impact(s) and possible mitigation and to explore alternatives to avoid or reduce those impacts. Accordingly, this positive declaration is issued.

Name of Action: Lakeview Amphitheater Facility

Name of Lead Agency: County of Onondaga

Name of Responsible Officer in Lead Agency: J. Ryan McMahon, II

Title of Responsible Officer: Chairman, Onondaga County Legislature

Signature of Responsible Officer in Lead Agency: 

Date: April 1, 2014

Signature of Preparer (if different from Responsible Officer) 

Date: February 25, 2014

**For Further Information:**

Contact Person: David Coburn - Director, Onondaga County Office of the Environment

Address: 421 Montgomery Street, Syracuse, NY 13202

Telephone Number: 315-435-2647

E-mail: DavidCoburn@ongov.net

**For Type 1 Actions and Conditioned Negative Declarations, a copy of this Notice is sent to:**

Chief Executive Officer of the political subdivision in which the action will be principally located (e.g., Town / City / Village of)

Other involved agencies (if any)

Applicant (if any)

Environmental Notice Bulletin: <http://www.dec.ny.gov/enb/enb.html>
